(54) LIQUID CRYSTAL DISPLAY DEVICE AND  
MANUFACTURING METHOD THEREFOR

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a narrow frame liquid crystal panel to meet the strong requirements that a display device for a cellular phone is preferably a small, light, and thin type.

SOLUTION: All the electrode terminals are gathered on one side of the liquid crystal panel so as to correspond to be of a single side mounting, by forming conversion wiring on the same resin layer as a resin layer with rugged cross sectional form serving also as a ground of a reflecting electrode.
